SOFIA METRO FIBER NETWORK

GUARANTEED CONNECTIVITY FOR BUSINESS AND INSTITUTIONS
WITH THE MOST MODERN, PRIVATE OPTICAL NETWORK IN SOFIA

Rated Excellent
★ Trustpilot

You need the most modern and secure Internet connectivity if:

- You are a large company and uncompromised Internet connectivity quality is key to your business.
- Any interruption of the Internet connection for you is measured in significant business losses.
- Do you own and/or develop office and industrial buildings; one of the main requirements of technology companies remains dedicated Internet connectivity and cyber security.
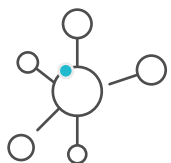

Our network covers all of Sofia, including all important business and institutional centers.

Our network provides state -of-the-art connectivity between all data centers in Sofia.
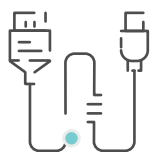

A key advantage for companies that use cloud services, multi-cloud systems and hybrid solutions.

MORE
BENEFITS

Full Coverage
Neterra's fiber network covers the entire Sofia city, including all important business centers and road arteries such as Tsarigradsko Shosse, Bulgaria Blvd., central streets and boulevards.

High Quality
The entire network is designed, owned, operated and maintained by Neterra. Therefore, we can guarantee the highest quality of service well as the highest availability.

Large capacity
Our state-of-the-art infrastructure enabled by GPON technology provides unlimited capacity to sustain the future growth of our customers.

All data centers
Neterra is the only company that, through its own optical network, reaches all the data centers in Sofia, enters them and connects them. This includes both Neterra's data centers and the data centers of other telecom operators.

Network throughout Bulgaria
Our Sofia metro fiber network joins our own National fiber backbone optical network, connecting all major Bulgarian cities such as Varna, Veliko Tarnovo, Burgas, Plovdiv, Ruse.

National Security
Neterra is the only operator with a Bulgarian national identity from the ownership point of view, which can offer its own and secure fiber network in Sofia and Bulgaria.

With Sofia Fiber Network from Neterra, you can count on both L1, L2 & L3 connectivity solutions and Internet services as well as DDoS protection and media streaming services 24/7 with the highest reliability, supported by qualified Network Operations Center (NOC) staff.
